

NL/2020/05 Photographic record (Monthly Monitoring Report for Preservation of Plant Species of Conservation Importance – May 2024)

1: T8217

2: T8217_Cross branches

3: T8217_Crown

4: T8231

NL/2020/05 Photographic record (Monthly Monitoring Report for Preservation of Plant Species of Conservation Importance – May 2024)

5: T8231_Broken trunk

6: U041

7: U041_Crown

8: U041_Dead stump

NL/2020/05 Photographic record (Monthly Monitoring Report for Preservation of Plant Species of Conservation Importance – May 2024)

9: U041_Dead stump_Close up, crack enlarged since late March 2024, extra staking was provided on 21 March 2024

10: U041_Wood damage at trunk union

11: U041_Another crack enlarged on May 2024

12: U041_Another crack enlarged on May 2024_Close up

NL/2020/05 Photographic record (Monthly Monitoring Report for Preservation of Plant Species of Conservation Importance – May 2024)

13: U042

14: U042_Wound on trunk

15: U043

16: U043_Crown

NL/2020/05 Photographic record (Monthly Monitoring Report for Preservation of Plant Species of Conservation Importance – May 2024)

17: U043_Wound on trunk#1

18: U043_Wound on trunk#2

19: Slit rock and protection zone

20: Temporary protective fencing for U041, U042 and U043

NL/2020/05 Photographic record (Monthly Monitoring Report for Preservation of Plant Species of Conservation Importance – May 2024)

21: Staking for T8231

22: Application of pesticide to prevent infection of wound of T8231

23: Pruning of jagged wound for T8231

Tree Schedule for Survey of Plant Species of Conservation Importance

Tree No.	Species			Measurements			Amenity Value (High(H) / Medium (M) / Low(L))	Tree Condition (Good(G) / Average(A) / Poor(P))			Recommendation (Retain / Transplant / Remove)	Findings	Remark
	Scientific Name	Chinese Name	Conservation Status	Height (m)	DBH (mm)	Crown Spread (m)		Form	Health	Structure			
T8217	<i>Canthium dicoccum</i>	魚骨木	IUCN:VU	9	220	6	L	P	A	P	Retain	No Particular Observation	There is no proper and safe assess towards T8231 & T8217, thus, plastics barriers were installed in lieu of 2m high barrier.
T8231	<i>Canthium dicoccum</i>	魚骨木	IUCN:VU	7	190	6	L	P	A	P	Retain	No Particular Observation	There is no proper and safe assess towards T8231 & T8217, thus, plastics barriers were installed in lieu of 2m high barrier. Epicormic branch failure was found on 3 May 2024. Staking, pruning of jagged wound and application of pesticide was conducted on 16 May 2024.
U041	<i>Aquilaria sinensis</i>	土沉香	RPPHK; Cap.586; IUCN:VU	10	318	4	M	A	P	A	Retain	No obvious old termite track was found, damage of wood tissue was observed. Crack was found similar to last inspection.	Located closed to cut slope and fenced off by 2m high barrier. The crack on trunk was found slightly larger since late March 2024. Extra staking was adjusted on 21 March 2024 to further support the tree. No termite track was found.
U042	<i>Gmelina chinensis</i>	石樟	RPPHK	6	150	2	M	A	P	A	Retain	Large wound near trunk base with wound wood development.	Located closed to cut slope and fenced off by 2m high barrier. No pest was found.
U043	<i>Aquilaria sinensis</i>	土沉香	RPPHK; Cap.586; IUCN:VU	9	310	4	M	A	P	A	Retain	No fungal fruiting bodies were found near trunk base.	Located closed to cut slope and fenced off by 2m high barrier. No fungal fruiting body and termite were found.

RPPHK - Species included in AFCD publication "Rare and Precious Plants of Hong Kong (2003)"
 Cap.586 – Native plants listed in Protection of Endangered Species of Animals and Plants Ordinance, Cap. 586.
 IUCN:VU – "Vulnerable" under IUCN Red List of Threatened Species
