Tree Schedule for Survey of Plant Species of Conservation Importance

Tree No.	Species			Measurements			Amenity Value (High(H) / Medium (M) / Low(L))	Tree Condition (Good(G) / Average(A) / Poor(P))			Recommendation (Retain / Transplant / Remove)	Findings	Remark
	Scientific Name	Chinese Name	Conservation Status	Height (m)	DBH (mm)	Crown Spread (m)		Form	Health	Structure			
T8217	<i>Canthium dicoccum</i>	魚骨木	IUCN:VU	9	220	6	L	P	A	P	Retain	No Particular Observation	There is no proper and safe assess towards T8231 & T8217, thus, plastics barriers were installed in lieu of 2m high barrier.
T8231	<i>Canthium dicoccum</i>	魚骨木	IUCN:VU	7	190	6	L	P	A	P	Retain	No Particular Observation	There is no proper and safe assess towards T8231 & T8217, thus, plastics barriers were installed in lieu of 2m high barrier. Epicormic branch failure was found on 3 May 2024. Staking, pruning of jagged wound and application of insecticide and fungicide was conducted on 16 May 2024 and 27 June 2024.
U041	<i>Aquilaria sinensis</i>	土沉香	RPPHK; Cap.586; IUCN:VU	10	318	4	M	A	P	A	Retain	No obvious old termite track was found, damage of wood tissue was observed. Crack was found slightly larger compared with last inspection. Fungal fruiting bodies was found on trunk and insect were found under trunk protection pad.	Located closed to cut slope and fenced off by 2m high barrier. The crack on trunk was found slightly larger since late March 2024. Extra staking was adjusted on 21 March 2024 to further support the tree. Application of insecticide and fungicide was conducted on 27 June 2024.
U042	<i>Gmelina chinensis</i>	石梓	RPPHK	6	150	2	M	A	P	A	Retain	Large wound near trunk base with wound wood development. Insects were found under trunk protection pad	Located closed to cut slope and fenced off by 2m high barrier. Application of insecticide was conducted on 27 June 2024.
U043	<i>Aquilaria sinensis</i>	土沉香	RPPHK; Cap.586; IUCN:VU	9	310	4	M	A	P	A	Retain	Fungal fruiting bodies were found near trunk base. Crack on trunk base. Fungal fruiting bodies was found on trunk and insect were found under trunk protection pad.	Located closed to cut slope and fenced off by 2m high barrier. . Application of insecticide and fungicide was conducted on 27 June 2024.

RPPHK - Species included in AFCD publication "Rare and Precious Plants of Hong Kong (2003)"
 Cap.586 – Native plants listed in Protection of Endangered Species of Animals and Plants Ordinance, Cap. 586.
 IUCN:VU – "Vulnerable" under IUCN Red List of Threatened Species
