

<p>A11 – Overall view</p>  A photograph showing the overall view of a tree (A11) with a dense green canopy. The tree is situated behind a red and white plastic safety barrier. The background shows a clear blue sky and distant hills. A yellow date stamp "12 05 2025" is visible in the bottom right corner of the image. <p>12 05 2025</p>	<p>A11 – Crown condition.</p>  A close-up photograph of the crown of tree A11, showing green leaves and some yellowing. A yellow date stamp "26 05 2025" is visible in the bottom right corner of the image. <p>26 05 2025</p>
<p>A11 – Shoots are epicormic generated from cut trunk which is decaying severely</p>  A close-up photograph of the trunk of tree A11, showing epicormic shoots growing from a decaying cut trunk. The trunk is surrounded by green leaves. A yellow date stamp "26 05 2025" is visible in the bottom right corner of the image. <p>26 05 2025</p>	<p>A11 – Fruiting was observed</p>  A close-up photograph of the branches of tree A11, showing green leaves and small, round, yellowish-green fruits. A white date stamp "2025.6.26 15:07" is visible in the bottom right corner of the image. <p>2025.6.26 15:07</p>

A11 – foliage density is moderate	A11 - Insect infestation observed.
	
A11 – trunk wound	A11 – trunk base
	

A11 – Application of insecticide was carried out in the reporting period

A11 – Application of insecticide was carried out in the reporting period

A11 - the larval stage of *Heortia vitessoides* (沉香黃野螟)

Tree Schedule for Survey of Plant Species of Conservation Importance

No.	Species		Conservation Status	Measurements			Tree Condition (Good(G) / Average(A) / Poor(P))			Recommendation (Retain / Transplant / Remove)	Findings	Remark
	Scientific Name	Chinese name		DBH (mm)	Height (m)	Crown (m)	Form	Health	Structure			
A9 (T7628)	<i>Aquilaria sinensis</i>	土沉香	RPPHK; Cap.586; IUCN:VU	-	-	-	-	-	-	-	-	Removed due to illegal felling on Aug 2023 (reported to police on 21 Aug 2023)
A10 (T7538)	<i>Aquilaria sinensis</i>	土沉香	RPPHK; Cap.586; IUCN:VU	-	-	-	-	-	-	-	-	Removed due to illegal felling on Aug 2023 (reported to police on 21 Aug 2023)
A11 (T7521)	<i>Aquilaria sinensis</i>	土沉香	RPPHK; Cap.586; IUCN:VU	190	3.5	1	P	A	P	Retain	Severe insect infestation was observed. Application of contact insecticide was conducted on 17/05/2025. Fruiting was observed	Root-plate movement (mentioned in previous monitoring report). Topped tree due to illegal felling on Aug 2023 (reported to police on 21 Aug 2023). Large decaying trunk wound.

*Notes:

DBH refers to Trunk Diameter at Breast Height

The Tree preservation work commenced in May 2025

RPPHK - Species included in AFCD publication "Rare and Precious Plants of Hong Kong (2003)"

Cap.586 – Native plants listed in Protection of Endangered Species of Animals and Plants Ordinance, Cap. 586.

IUCN:VU – "Vulnerable" under IUCN Red List of Threatened Species

<p>A8 – Overall view</p>  A photograph showing the overall view of tree A8. The tree is supported by a black mesh cage and three wooden stakes. It is surrounded by a white and red plastic barrier. The date 04 05 2025 is visible in the bottom right corner. <p>04 05 2025</p>	<p>A8 – Crown condition.</p>  A photograph showing the crown condition of tree A8. The tree has a dense canopy of green leaves. The date 04 05 2025 is visible in the bottom right corner. <p>04 05 2025</p>
<p>A8 – Pruning wound previously damaged by typhoon KOINU (Oct 2023)</p>  A photograph showing a pruning wound on the trunk of tree A8. The wound is a deep, vertical cut in the bark. The date 04 05 2025 is visible in the bottom right corner. <p>04 05 2025</p>	<p>A8 – Trunk and root condition.</p>  A photograph showing the trunk and root condition of tree A8. The tree is supported by a black mesh cage and three wooden stakes. It is surrounded by a white and red plastic barrier. The date 04 05 2025 is visible in the bottom right corner. <p>04 05 2025</p>

<p>A8 – Decaying wound at trunk base (size: ~180mm x170mm)</p> 	<p>A8 – Decaying wound on trunk</p> 
<p>A8 – Ant nest was not found</p> 	

A12 - Overall View

A12 - Dieback observed. Dead branches were removed on 07/12/2024

A12 - Foliage density is still low.

A12 – Trunk and root condition

<p>A12 –Wound at trunk base</p>  <p>04 05 2025</p>	<p>A12 – Decaying wound on trunk</p>  <p>04 05 2025</p>
<p>A12 - Fruiting was observed.</p>  <p>04 05 2025</p>	<p>Fencing is in order</p>  <p>04 05 2025</p>

Weeding and grass cutting on 7 May 2025.

Adjustment of staking on 10 May 2025.

Insecticide was applied on 10 May 2025 - A8

Insecticide was applied on 10 May 2025 – A12

Manual watering was carried out for A8 during the reporting period. The watering frequency is one to two times per week.

Manual watering was carried out for A12 during the reporting period. The watering frequency is one to two times per week.

Tree Schedule for Survey of Plant Species of Conservation Importance

No.	Species		Conservation Status	Measurements			Tree Condition (Good(G) / Average(A) / Poor(P))			Recommendation (Retain / Transplant / Remove)	Findings	Remark
	Scientific Name	Chinese name		DBH (mm)	Height (m)	Crown (m)	Form	Health	Structure			
A8 (T8996)	<i>Aquilaria sinensis</i>	土沉香	RPPHK; Cap.586; IUCN:VU	110	5	4	P	P	P	Transplant	Ant nest was not found. The foliage density is low. No obvious wound wood production. Fruiting was observed.	Originally located at Site 1. Trunk wounds were observed before transplant operation. Shallow root. Sudden defoliation happened in May 2023 but recovered in Aug 2023. It was translocated to the temporary holding nursery on 29 Sep 2023. A branch (5cm) was broken and foliage density decreased due to typhoon in Oct 2023.
A12 (T3537)	<i>Aquilaria sinensis</i>	土沉香	RPPHK; Cap.586; IUCN:VU	185	8	3	P	P	A	Transplant	The foliage density is low. No obvious wound wood production. Fruiting was observed.	Originally located at Site 5. Trunk wounds were observed before transplant operation. Shallow root. Original root ball was full of stones which were removed partially during the translocation. It was translocated to the temporary holding nursery on 29 Sep 2023. It collapsed during typhoon dated Oct 2023 resulted in largely reduction in foliage density. It was slightly lean after a typhoon event dated 13-14 Nov 2024 and reinstated.
